

CDF SAM issues/requests

Doug Benjamin & Krzysztof Genser

CDF SAM Priorities

1.) achieve dbserver stability

- 2.) complete oracle 9i->10g migration
- 3.) provide support for the raw data logging (fss/stager)
- 4.) help in deploying CAF-SAM interface
- 5.) sam_cpp_api (newer build >RH7 or more transparent wrt to Linux by May)
- 6.) adopt more formal release methodology
- 7.) add sufficient retries to sam_cpp_api & SAM client to make user jobs less prone to abort for SAM related reasons.
- 8.) deploy SAM-SRM interface (by July)
- 9.) establish a formal procedure to reduce the number of open issues
- 10.) address dbserver slow performance
- 11.) deploy redundant naming service

Expect more SAM usage...
